

Environmental Policy

JD Excavations provide building and civil engineering services to a range of clients. JD Excavations recognises that good management includes all environmental matters and ensures that environmental protection and the prevention of pollution are part of all decisions, policies, activities, products and services. We encourage environmental responsibility through all levels of our organisation, by employee awareness, environmental communication, and training.

The company will:

- Ensure compliance with all applicable environmental legislation and other requirements to which the company subscribes which relate to our environmental aspects
- Provide for the publication of the Environmental Policy internally, by posting the document on the premises of the company and externally to all interested parties, on request.
- Provide for the setting and achievement of environmental objectives and targets for the company, and for the publication of the environmental objectives and targets by the posting of the document in the premises of the company.
- Maintain efforts to achieve continual improvement in the environmental performance of the company, the starting point being to comply fully with the requirements of ISO14001:2004.
- Avoid the depletion of natural resources by endeavouring to reduce paper use and recycle waste paper and office consumables.
- Select suppliers who themselves take responsibility for environmental issues.
- Foster openness, dialogue and discussion with employees, clients, suppliers, contractors and all interested parties regarding the environmental performance and the environmental objectives and targets of the company.
- Measure environmental performance by conducting regular environmental audits and assessments of compliance with the Environmental Policy, relevant environmental legislation and the requirements of the company.
